Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.
2. This application contains the following inventions or groups of inventions that are not so linked as to form a single general inventive concept under PCT Rule 13.1.
3. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-3 and 7-9, drawn to nucleic acids.

Group II, claim(s) 4, drawn to isolated oligophrenin 1 polypeptide.

Group III, claim(s) 5, drawn to a vector; claim 6, drawn to a host cell; and claim 10, drawn to a method of producing a recombinant oligophrenin 1 polypeptide.

Group IV, claim(s) 11, drawn to antibodies.

Group V, claim(s) 12, drawn to a method of using antibodies.

Group VI, claim(s) 13, drawn to a method of using a nuclei acid and claims 14-17, drawn to drawn to a method of nucleic cid-based in vitro diagnostics.

Group VII, claim(s) 18-20, drawn to pharmaceutical compositions; claim 23, drawn to a drug; claim 24, drawn to a pharmaceutical composition comprising said drug; and claim 25, drawn to a method of preventing and/or treating neurological disorders resulting from defects in the oligophrenin 1 gene or in the oligophrenin 1 protein or in a homologous gene or protein thereof.

Group IX, claim(s) 22, drawn to a method of screening drugs.

4. The inventions listed as Groups I-IX do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The nucleic cid of claim 1 can be a fragment thereof as evidenced by dependent claim 7. Claim 1, however, places no minimal size of the fragment, nor does the claim place any functional limitations on same. Accordingly, the nucleic cid of claim 1 is fairly anticipated by not only random primers tht are commercially available, but on mononucleotides as well, both of which are known in the art.

Art Unit: 1634

5. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

6. The species are as follows:

In the event that applicant elects the invention of either Group I, II, III, VI, VII, or VIII applicant is required to elect but a single sequence (nucleic acid or polypeptide as applicable) for examination.

6. Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

7. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

8. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The drug of claim 23 does not require the mononucleotide or random primer encompassed by claim 1.

Art Unit: 1634

9. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

10. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
